Exam Quantum Field Theory – January 2020

The exam consists of 2 exercises. You first fully solve the questions (on paper) and subsequently you come to me. Then we will review together your answers and I'll ask some additional questions.

A few important points:

- You can use Mandl & Shaw but nothing else (no notes, homeworks, smartphones, ...).
- Bring your own writing paper!

VUB students

The exam is held in room F9.02. The oral examination is in my office F9.06.

- Thursday January 9
